“ Our Success Stories

Inspiring stories of how people transformed their careers.

S

Shraddha B, Associate Engineer

Very informative session

Overall a very informative training session. The course content was planned well and demonstrated the concept very well. Thank you for such an easy to understand training session which cleared my basics in Tekla. I found it very helpful for my future growth and development.

M

Madhav P, Tekla modeler

I feel very confident in my skills

I was a student of August 2019 Tekla batch. The faculty was very experienced with wonderful skills in Tekla. They taught us everything from basic to advanced level which is helpful in Precast and Steel industry. They were also available to solve our problems and share their experience and knowledge even after training period.

K

Khilesh B, Associate Engineer

Immensely practical training

Training under PPS Centre of Excellence helps you to learn Tekla from basics to detailing and modeling. You also get to study their previous projects which gives you practical knowledge of a real work environment. PPS can also provide internship to work with them.
