## About Us

We started PPS CoE with the aim to create a training platform which will help the people seeking to start a career or sharpen their skills in the Civil Engineering field. Since then, we have transformed many individuals' careers by providing them training in various BIM softwares like Tekla, Revit, STAAD.Pro, etc.

Our institute provides one of the best training in Tekla as we are Trimble Tekla authorized trainers. We pride ourselves in providing the best training in the courses we offer as each of our trainers has 20+ years of experience in their respective fields as working professionals who do projects day in and day out on a global scale.

The complexity of any civil engineering project can be handled with ease and clashes can be detected early on with the help of BIM technology. These softwares not only help create great models but also save time and effort by serving as a common communication ground. Our trainers have worked on the following projects with the help of BIM technology:
